1. ACCOUNTING POLICIES

In the opinion of Titan International, Inc. (Titan or the Company), the accompanying unaudited consolidated condensed financial statements contain all adjustments, which are normal and recurring in nature and necessary to present fairly the Company's financial position as of March 31, 2009, and the results of operations and cash flows for the three months ended March 31, 2009 and 2008.

Accounting policies have continued without significant change and are described in the Description of Business and Significant Accounting Policies contained in the Company's 2008 Annual Report on Form 10-K. These interim financial statements have been prepared pursuant to the Securities and Exchange Commission's rules for Form 10-Q's and, therefore, certain information and footnote disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's 2008 Annual Report on Form 10-K. Certain amounts from prior years have been reclassified to conform to the current year's presentation.

All share and per share data, except shares authorized, have been adjusted to reflect the effect of the stock split for all periods presented.

Investment in Titan Europe Plc	<u>\$ 2,462</u>	<u>\$ 2,649</u>

Titan Europe Plc is publicly traded on the AIM market in London, England. During the first quarter of 2009, the Company purchased \$2.4 million of additional shares in Titan Europe Plc, thereby increasing its investment from 17.2% to a 22.9% ownership percentage. The Company has considered the applicable guidance in APB 18, "The Equity Method of Accounting for Investments in Common Stock," and FIN 35, "Criteria for Applying the Equity Method of Accounting for Investments in Common Stock," and has concluded that the Company's investment in Titan Europe Plc should continue to be accounted for as an available-for-sale security and recorded at fair value in accordance with FAS 115, "Accounting for Certain Investments in Debt and Equity Securities." The Company has determined that the equity method of accounting for this investment is not appropriate after considering all of the facts and circumstances relating to the investment. In particular, the Company has concluded that its inability to obtain the needed quarterly financial information from Titan Europe Plc is an indication that the Company does not have the ability to exercise significant influence over the financial and operating policies of this investee. The investment in Titan Europe Plc is included as a component of other assets on the Consolidated Condensed Balance Sheets. The reduced value in the Titan Europe Plc investment at March 31, 2009, was due to a decrease in the publicly quoted Titan Europe Plc market price.

No goodwill charges were recorded in the first three months of 2009 or 2008. There can be no assurance that future goodwill tests will not result in a charge to earnings.

17. LITIGATION

The Company is a party to routine legal proceedings arising out of the normal course of business. Although it is not possible to predict with certainty the outcome of these unresolved legal actions or the range of possible loss, the Company believes at this time that none of these actions, individually or in the aggregate, will have a material adverse affect on the consolidated financial condition, results of operations or cash flows of the Company. However, due to the difficult nature of predicting unresolved and future legal claims, the Company cannot anticipate or predict the material adverse effect on its consolidated financial condition, results of operations or cash flows as a result of efforts to comply with or its liabilities pertaining to legal judgments.

18. FAIR VALUE MEASUREMENTS

The adoption of SFAS No. 157 for nonfinancial assets and nonfinancial liabilities, effective January 1, 2009, did not have a material impact on Titan's consolidated financial position, results of operations or cash flows.

SFAS No. 157 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1 – defined as quoted prices in active markets for identical instruments; Level 2 – defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3 – defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

Assets and liabilities measured at fair value on a recurring basis consisted of the following (in thousands):

	Fair Value Measurements as of March 31, 2009			
	Total	Level 1	Level 2	Level 3
Investment in Titan Europe Plc	\$ 2,462	\$ 2,462	\$ 0	\$ 0
Investments for contractual obligations	4,322	4,322	0	0
Total	\$ 6,784	\$ 6,784	\$ 0	\$ 0

19. RECENTLY ISSUED ACCOUNTING STANDARDS

Statement of Financial Accounting Standards Number 141 (revised 2007)

In January 2009, the Company adopted, SFAS No. 141 (revised 2007), "Business Combinations." This statement requires an acquirer to recognize assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at their fair values on the acquisition date, with goodwill being the excess value over the net identifiable assets acquired. The adoption of SFAS No. 141 (revised 2007) had no material effect on the Company's financial position, results of operations or cash flows.

FASB Staff Position No. FAS 107-1 and APB 28-1

In April 2009, FASB Staff Position (FSP) No. FAS 107-1 and APB 28-1, "Interim Disclosures about Fair Value of Financial Instruments," was issued. This FSP amends FASB Statement No. 107, "Disclosures about Fair Value of Financial Instruments," to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. This FSP also amends APB Opinion No. 28, "Interim Financial Reporting," to require disclosures in summarized financial information at interim reporting periods. This FSP is effective for interim reporting periods ending after June 15, 2009.

FASB Staff Position No. FAS 115-2 and FAS 124-2

In April 2009, FSP No. FAS 115-2 and FAS 124-2, "Recognition and Presentation of Other-Than-Temporary Impairments," was issued. This FSP amends the other-than-temporary impairment guidance in U.S. GAAP for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. This FSP does not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. This FSP is effective for interim reporting periods ending after June 15, 2009. The Company is evaluating the effect the adoption of this standard will have on its consolidated financial position, results of operations and cash flows.

Financial Condition and Results of Operations

OVERVIEW

Titan International, Inc. and its subsidiaries are leading manufacturers of wheels, tires and assemblies for off-highway vehicles used in the agricultural, earthmoving/construction and consumer markets. Titan manufactures both wheels and tires for the majority of these market applications, allowing the Company to provide the value-added service of delivering complete wheel and tire assemblies. The Company offers a broad range of products that are manufactured in relatively short production runs to meet the specifications of original equipment manufacturers (OEMs) and/or the requirements of aftermarket customers.

Agricultural Market: Titan's agricultural rims, wheels and tires are manufactured for use on various agricultural and forestry equipment, including tractors, combines, skidders, plows, planters and irrigation equipment, and are sold directly to OEMs and to the aftermarket through independent distributors, equipment dealers and Titan's own distribution centers.

Earthmoving/Construction Market: The Company manufactures rims, wheels and tires for various types of off-the-road (OTR) earthmoving, mining, military and construction equipment, including skid steers, aerial lifts, cranes, graders and levelers, scrapers, self-propelled shovel loaders, articulated dump trucks, load transporters, haul trucks and backhoe loaders. The earthmoving/construction market is often referred to as OTR, an acronym for off-the-road.

Consumer Market: Titan builds a variety of products for all-terrain vehicles (ATV), turf, golf and trailer applications. Titan's sales in the consumer market include sales to Goodyear, which are under an off-take/mixing agreement. This agreement includes mixed stock, which is a prepared rubber compound used in tire production. The Company provides wheels/tires and assemblies brakes, actuators and components for the domestic boat, recreational and utility trailer markets.

The Company's major OEM customers include large manufacturers of off-highway equipment such as AGCO Corporation, Caterpillar Inc., CNH Global N.V., Deere & Company and Kubota Corporation, in addition to many other off-highway equipment manufacturers. The Company distributes products to OEMs, independent and OEM-affiliated dealers, and through a network of distribution facilities.

The following table provides highlights for the quarter ended March, 2009, compared to 2008 (amounts in thousands):

	Three months ended March		%
	31,		
	2009	2008	Decrease
Net sales	\$ 232,604	\$ 253,525	(8)%
Gross profit	30,063	32,344	(7)%
Income from operations	14,077	16,120	(13)%
Net income	7,041	8,134	(13)%

The Company recorded sales of \$232.6 million for the first quarter of 2009, which were 8% lower than the first quarter 2008 sales of \$253.5 million. The lower sales were the result of reduced demand in the Company's earthmoving/construction market, a consequence of the worldwide recession.

The following operating results were primarily related to the lower sales levels. The Company's income from operations was \$14.1 million for the first quarter of 2009, compared to \$16.1 million in 2008. Net income was \$7.0 million for the quarter, compared to \$8.1 million in 2008. Basic earnings per share were \$.20 in the first quarter of 2009, compared to \$.24 in 2008.

TITAN INTERNATIONAL, INC.
Management's Discussion and Analysis of
Financial Condition and Results of Operations

CRITICAL ACCOUNTING ESTIMATES

Preparation of the financial statements and related disclosures in compliance with accounting principles generally accepted in the United States of America requires the application of appropriate technical accounting rules and guidance, as well as the use of estimates. The Company's application of these policies involves assumptions that require difficult subjective judgments regarding many factors, which, in and of themselves, could materially impact the financial statements and disclosures. A future change in the estimates, assumptions or judgments applied in determining the following matters, among others, could have a material impact on future financial statements and disclosures.

Inventories

Inventories are valued at lower of cost or market. Cost is determined using the first-in, first-out (FIFO) method for approximately 72% of inventories and the last-in, first-out (LIFO) method for approximately 28% of inventories. The major rubber material inventory and related work-in-process and their finished goods are accounted for under the FIFO method. The major steel material inventory and related work-in-process and their finished goods are accounted for under the LIFO method. Market value is estimated based on current selling prices. Estimated provisions are established for slow-moving and obsolete inventory, as well as inventory carried above market price based on historical experience. Should experience change, adjustments to estimated provisions would be necessary.

Impairment of Goodwill

The Company reviews goodwill to assess recoverability from future operations during the fourth quarter of each annual reporting period, and whenever events and circumstances indicate that the carrying values may not be recoverable. The Company had goodwill of \$11.7 million at March 31, 2009. Significant assumptions relating to future operations must be made when estimating future cash flows in analyzing goodwill for impairment. Should unforeseen events occur or operating trends change significantly, impairment losses could occur.

Income taxes

Deferred income tax provisions are determined using the liability method whereby deferred tax assets and liabilities are recognized based upon temporary differences between the financial statement and income tax basis of assets and liabilities. The Company assesses the realizability of its deferred tax asset positions in accordance with SFAS No. 109, "Accounting for Income Taxes." The Company recognizes and measures uncertain tax positions in accordance with FIN 48, "Accounting for Uncertainty in Income Taxes."

Asset and Business Acquisitions

The allocation of purchase price for asset and business acquisitions requires management estimates and judgment as to expectations for future cash flows of the acquired assets and business and the allocation of those cash flows to identifiable intangible assets in determining the estimated fair value for purchase price allocations. If the actual results differ from the estimates and judgments used in determining the purchase price allocations, impairment losses could occur relating to any intangibles recorded in the acquisition. To aid in establishing the value of any intangible assets at the time of acquisition, the Company typically engages a professional appraisal firm.

Retirement Benefit Obligations

Pension benefit obligations are based on various assumptions used by third-party actuaries in calculating these amounts. These assumptions include discount rates, expected return on plan assets, mortality rates and other factors. Revisions in assumptions and actual results that differ from the assumptions affect future expenses, cash funding requirements and obligations. The Company has three frozen defined benefit pension plans and one defined benefit plan that purchased a final annuity settlement in 2002. Titan expects to contribute approximately \$1 million to these frozen defined pension plans during the remainder of 2009. For more information concerning these costs and obligations, see the discussion of the "Pensions" and Note 21 to the Company's financial statements on Form 10-K for the fiscal year ended December 31, 2008.

	2009	2008
Net income	\$ 7,041	\$ 8,134

Net income for the first quarter of 2009 was \$7.0 million, compared to \$8.1 million in 2008. Basic earnings per share were \$.20 for the first quarter of 2009, compared to \$.24 in the first quarter of 2008. Diluted earnings per share were \$.20 for the first quarter of 2009, compared to \$.23 in 2008. The Company's net income and earnings per share decreased due to the items detailed above.

Agricultural Segment Results

Agricultural segment results were as follows (amounts in thousands):

	Three months ended March 31,	
	2009	2008
Net sales	\$ 187,328	\$ 173,486
Gross profit	24,920	19,693
Income from operations	20,085	16,443

Net sales in the agricultural market were \$187.3 million for the first quarter of 2009, as compared to \$173.5 million in 2008. The strong agricultural segment sales were the result of continued high demand from the Company's customers, an effect of record farm income. A primary driver for the higher sales in the agricultural segment was the high demand for large agricultural equipment.

Gross profit in the agricultural market was \$24.9 million for the first quarter of 2009, compared to the \$19.7 million in 2008. Income from operations in the agricultural market was \$20.1 million for the first quarter of 2009, compared to \$16.4 million for the first quarter of 2008. The increase in gross profit and income from operations in the agricultural market was primarily attributed to the continued strong farm equipment sales.

Earthmoving/Construction Segment Results

Earthmoving/Construction segment results were as follows (amounts in thousands):

	Three months ended March 31,	
	2009	2008
Net sales	\$ 39,927	\$ 73,833
Gross profit	4,884	11,911
Income from operations	3,840	9,802

The Company's earthmoving/construction market net sales were \$39.9 million for the first quarter of 2009, as compared to \$73.8 million in 2008. The major sales contraction in earthmoving/construction resulted from significantly reduced demand for earthmoving/construction machinery, a consequence of the worldwide recession and global economic crisis. A primary reason for the decline in this segment was the monumental reduction in the construction areas related to commercial, residential and infrastructure.

Gross profit in the earthmoving/construction market was \$4.9 million for the first quarter of 2009, as compared to \$11.9 million in 2008. Income from operations in the earthmoving/construction market was \$3.8 million for the first quarter of 2009 versus \$9.8 million in 2008. Gross profit and income from operations declined as a result of the major sales reduction.

Consumer Segment Results

Consumer segment results were as follows (amounts in thousands):

	Three months ended March 31,	
	2009	2008
Net sales	\$ 5,349	\$ 6,206
Gross profit	788	1,049
Income from operations	637	869

Consumer market net sales were \$5.3 million for the first quarter of 2009, as compared to \$6.2 million in 2008. The Goodyear farm tire acquisition agreement included an off-take/mixing agreement for certain product sales to Goodyear. The reduction in consumer market sales is related to lower sales to The Goodyear Tire & Rubber Company of approximately \$0.7 million quarter over quarter.

Gross profit from the consumer market was \$0.8 million for the first quarter of 2009, as compared to \$1.0 million in 2008. Consumer market income from operations was \$0.6 million for the first quarter of 2009, as compared to \$0.9 million for 2008. Gross profit and income from operations declined proportionately with sales in the consumer market.

The remaining expenditures represent various equipment purchases and improvements to enhance production capabilities. The Company estimates that costs related to the Giant OTR Project at this time are approximately \$104 million, of which approximately \$95 million was disbursed from inception of the Giant OTR Project through March 31, 2009. In addition to the OTR Project, the Company estimates that its capital expenditures for other projects for the remainder of 2009 could range from \$6 million to \$8 million.

Debt Covenants

The Company's revolving credit facility (credit facility) contains various covenants and restrictions. The financial covenants in this agreement require that:

- Collateral coverage be equal to or greater than 1.2 times the outstanding revolver balance.
- If the 30-day average of the outstanding revolver balance exceeds \$125 million, the fixed charge coverage ratio be equal to or greater than a 1.0 to 1.0 ratio.

Restrictions include:

- Limits on payments of dividends and repurchases of the Company's stock.
- Restrictions on the ability of the Company to make additional borrowings, or to consolidate, merge or otherwise fundamentally change the ownership of the Company.
- Limitations on investments, dispositions of assets and guarantees of indebtedness.
- Other customary affirmative and negative covenants.

These covenants and restrictions could limit the Company's ability to respond to market conditions, to provide for unanticipated capital investments, to raise additional debt or equity capital, to pay dividends or to take advantage of business opportunities, including future acquisitions. The failure by Titan to meet these covenants could result in the Company ultimately being in default on these loan agreements.

The Company is in compliance with these covenants and restrictions as of March 31, 2009. The collateral coverage was calculated to be approximately 14.5 times the outstanding revolver balance at March 31, 2009.

The fixed charge coverage ratio did not apply for the quarter ended March 31, 2009. The credit facility usage was \$30.0 million at March 31, 2009, consisting of \$25.0 million of cash borrowings and \$5.0 million of outstanding letters of credit.

Other Issues

The Company's business is subject to seasonal variations in sales that affect inventory levels and accounts receivable balances. Historically, Titan tends to experience higher sales demand in the first and second quarters.

Liquidity Outlook

At March 31, 2009, the Company had \$20.2 million of cash and cash equivalents and \$120.0 million of unused availability under the terms of its credit facility. The availability under the Company's \$150 million credit facility was reduced by \$25.0 million for cash borrowings and \$5.0 million for outstanding letters of credit. The Company expects to contribute approximately \$1 million to its frozen defined benefit pension plans during the remainder of 2009.

The Company estimates that current commitments related to the Giant OTR Project for 57-inch and 63-inch giant radial tires at this time are approximately \$104 million, of which approximately \$95 million was disbursed from inception of the Giant OTR Project through March 31, 2009. Additional capital expenditure commitments will be incurred through 2009 as the Giant OTR Project moves to completion. The final cost of these additional OTR capital items have not been finalized at this time.

The Company currently anticipates that cash on hand and anticipated internal cash flows from operations will allow the Company sufficient funds for completion of the Giant OTR Project. In addition to the OTR Project, the Company estimates that its capital expenditures for other projects for remainder of 2009 could range from \$6 million to \$8 million.

Cash on hand, anticipated internal cash flows from operations and utilization of remaining available borrowings are expected to provide sufficient liquidity for working capital needs and capital expenditures. If the Company were to exhaust all currently available working capital sources or not meet the financial covenants and conditions of its loan agreements, the Company's ability to secure additional funding may be negatively impacted.

PENSIONS

The Company has three frozen defined benefit pension plans and one defined benefit plan that purchased a final annuity settlement in 2002. These plans are described in Note 21 of the Company's Notes to Consolidated Financial Statements in the 2008 Annual Report on Form 10-K.

The Company's recorded liability for pensions is based on a number of assumptions, including discount rates, rates of return on investments, mortality rates and other factors. Certain of these assumptions are determined by the Company with the assistance of outside actuaries. Assumptions are based on past experience and anticipated future trends. These assumptions are reviewed on a regular basis and revised when appropriate. Revisions in assumptions and actual results that differ from the assumptions affect future expenses, cash funding requirements and the carrying value of the related obligations. Titan expects to contribute approximately \$1 million to these frozen defined pension plans during the remainder of 2009.

NEW ACCOUNTING STANDARDS**Statement of Financial Accounting Standards Number 141 (revised 2007)**

In January 2009, the Company adopted, SFAS No. 141 (revised 2007), "Business Combinations." This statement requires an acquirer to recognize assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at their fair values on the acquisition date, with goodwill being the excess value over the net identifiable assets acquired. The adoption of SFAS No. 141 (revised 2007) had no material effect on the Company's financial position, results of operations or cash flows.

FASB Staff Position No. FAS 107-1 and APB 28-1

In April 2009, FASB Staff Position (FSP) No. FAS 107-1 and APB 28-1, "Interim Disclosures about Fair Value of Financial Instruments," was issued. This FSP amends FASB Statement No. 107, "Disclosures about Fair Value of Financial Instruments," to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. This FSP also amends APB Opinion No. 28, "Interim Financial Reporting," to require disclosures in summarized financial information at interim reporting periods. This FSP is effective for interim reporting periods ending after June 15, 2009.

FASB Staff Position No. FAS 115-2 and FAS 124-2

In April 2009, FSP No. FAS 115-2 and FAS 124-2, "Recognition and Presentation of Other-Than-Temporary Impairments," was issued. This FSP amends the other-than-temporary impairment guidance in U.S. GAAP for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. This FSP does not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. This FSP is effective for interim reporting periods ending after June 15, 2009. The Company is evaluating the effect the adoption of this standard will have on its consolidated financial position, results of operations and cash flows.

TITAN INTERNATIONAL, INC.
Management's Discussion and Analysis of
Financial Condition and Results of Operations

MARKET CONDITIONS AND OUTLOOK

Titan continued to experience strong demand for the Company's agricultural products during the first quarter of 2009. This strong demand is expected to continue through the first half of 2009. However, the Company's earthmoving/construction market has seen major declines resulting from the worldwide economic crisis. The magnitude and duration of this crisis make it extremely difficult to forecast future sales levels.

Energy, raw material and petroleum-based product costs have been exceptionally volatile and increases in these costs may negatively impact the Company's margins. Many of Titan's overhead expenses are fixed; therefore, lower seasonal trends may cause negative fluctuations in quarterly profit margins and affect the financial condition of the Company.

AGRICULTURAL MARKET OUTLOOK

Agricultural market sales are forecasted to remain relatively strong through the first half of 2009. Commodity prices have declined from last year's highs, but remain at healthy levels. Farmers should benefit from lower input costs for fuel and fertilizer. The gradual increase in the use of biofuels may help sustain future production. However, the magnitude and duration of the worldwide economic crisis make it extremely difficult to forecast future sales levels. Many variables, including weather, grain prices, export markets and future government policies and payments can greatly influence the overall health of the agricultural economy.

EARTHMOVING/CONSTRUCTION MARKET OUTLOOK

Sales for the earthmoving/construction market are expected to be lower in 2009 as a result of the worldwide economic crisis. The magnitude and duration of this crisis make it extremely difficult to forecast future sales levels. Metals, oil and gas prices have retreated from last year's highs as a result of the economic crisis. In the long-term, these prices are expected to return to levels that are attractive for continued investment, which should help support future earthmoving and mining sales. However, many producers are currently delaying new investments affecting current year sales. The large decline in the United States housing market continues to cause a decline in demand for equipment used for construction. The earthmoving/ construction segment is affected by many variables, including commodity prices, road construction, infrastructure, government appropriations, housing starts and the current banking and credit crisis.

CONSUMER MARKET OUTLOOK

The current overall uncertainty in consumer spending resulting from the current banking and credit crisis, housing market decline, and high energy and food costs has affected the Company's consumer market sales. Titan's sales in the consumer market include sales to Goodyear, which includes an off-take/mixing agreement. This agreement includes mixed stock, which is a prepared rubber compound used in tire production. The Company's consumer market sales may fluctuate significantly related to sales volumes under the off-take/mixing agreement with Goodyear. The Company expects challenging conditions for the consumer market for the remainder of 2009. Many factors affect the consumer market including weather, competitive pricing, energy prices and consumer attitude.

TITAN INTERNATIONAL, INC.**PART I. FINANCIAL INFORMATION****Item 3. Quantitative and Qualitative Disclosures About Market Risk**

See the Company's 2008 Annual Report filed on Form 10-K (Item 7A). There has been no material change in this information.

Item 4. Controls and Procedures**Evaluation of Disclosure Controls and Procedures**

The Company's principal executive officer and principal financial officer have concluded the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) are effective as of the end of the period covered by this Form 10-Q based on an evaluation of the effectiveness of disclosure controls and procedures.

Changes in Internal Controls

There were no material changes in internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) that occurred during the first quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Because of its inherent limitations, internal controls over financial reporting may not prevent or detect misstatements. Also, projections of any evaluations of the effectiveness to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

TITAN INTERNATIONAL, INC.**PART II. OTHER INFORMATION****Item 1. Legal Proceedings**

The Company is a party to routine legal proceedings arising out of the normal course of business. Although it is not possible to predict with certainty the outcome of these unresolved legal actions or the range of possible loss, the Company believes at this time that none of these actions, individually or in the aggregate, will have a material adverse affect on the consolidated financial condition, results of operations or cash flows of the Company. However, due to the difficult nature of predicting unresolved and future legal claims, the Company cannot anticipate or predict the material adverse effect on its consolidated financial condition, results of operations or cash flows as a result of efforts to comply with or its liabilities pertaining to legal judgments.
