# Strong end to the year – toward a better 2021

"Like most companies in 2020, Trelleborg was impacted to a high degree by the ongoing pandemic. Priority was assigned to measures to protect our personnel, while we succeeded in offsetting the reduction in sales through a flexible cost base and structural improvements. Despite the circumstances, we were able to deliver a good result, with an improved operating margin and record-strong cash flow compared with 2019, for both the full year and the fourth quarter.

Our employees at all levels of the Group have made the best of a difficult situation and we have adapted our operations and way of working in line with the new reality in an exemplary fashion. Our decentralized approach enabled rapid operational action throughout the organization.

We closed 2020 with a strong quarter. Organic sales declined by 3 percent, meaning that demand continued to improve sequentially. We had a strong currency headwind, which accounted for a 7-percent fall in sales. Cost reductions and structural improvements during the year, combined with slightly better demand, led to the best fourth quarter to date for the Group, in terms of both EBIT and operating margin. This favorable result was achieved despite a negative currency impact on EBIT amounting to SEK 96 M. Cash flow was even stronger, namely the strongest ever for a single quarter.

That said, we continued to be affected by the Coronavirus pandemic. Local outbreaks continue to occur and at the time of writing, production in some parts of China is shut down as a result of official decisions. In other locations, we are seeing unusually high employee absence, which creates operational challenges and ineffectiveness for us and some of our suppliers.

In the Trelleborg Industrial Solutions business area, the recovery continued in the fourth quarter, mainly in Asia, but also in Europe. Deliveries to the automotive industry were highly favorable and sales to the construction-related market segment grew somewhat. Robust cost optimization and a positive sales mix led to improved earnings.

Sales in Trelleborg Sealing Solutions to the aerospace industry continued to be subject to the strong negative effects of the pandemic and, accordingly, an adjustment to long-term reduced demand is under way in the business area. However, the market situation improved in most of the other segments, such as general industry, healthcare & medical and, not least, the automotive industry. Asia developed particularly well, but there was also a clear improvement in the situation in Europe during the quarter.

Sales in Trelleborg Wheel Systems of tires for agricultural machinery increased significantly in most markets, driven by pent-up demand and a generally favorable agricultural market with rising cereal prices. Deliveries of agricultural tires increased in all markets, to both OEMs and aftermarket customers. However, the market situation remained difficult for tires for material handling vehicles and construction vehicles, which declined in both sales channels. Structural improvements and cost adjustments implemented made a positive contribution to earnings.

In our Businesses Under Development reporting segment, sales declined, primarily driven by weak performance in offshore oil & gas and printing blankets. The operations continue to be affected by the Coronavirus pandemic and the restrictions that are still in place.

Discussions with external stakeholders regarding several of our units within Businesses Under Development have intensified and are far advanced in some cases. We are very hopeful that it will be possible to implement structural transactions in the near future. This is well within the framework of our initial communication, that all discussions will have produced results by the end of 2021.

We recently launched a new ambitious climate target, "50 by 25", meaning that the Group will halve its CO<sub>2</sub> emissions relative to sales by 2025. This in conjunction with a vision statement to achieve complete climate neutrality in our own operations, meaning net zero emissions, by the end of 2035.

Finally, I want to share our hope that the positive results from the fourth quarter is a taste of an even stronger 2021. Our strategy to be market leader in selected niches has served us well over the past year and Trelleborg will improve further in the periods to come. Our general assessment in the current situation is that demand for the first quarter will be somewhat better compared with the fourth quarter."

## RISK MANAGEMENT

Trelleborg serves a broad range of customers in a variety of market segments and niches. The business has a wide geographic spread. The Group has operations in about 50 countries, sales are conducted in just over 150 countries worldwide and manufacturing operations are carried out at more than 100 production sites. The business is diversified, which provides Trelleborg with an effective underlying risk spread.

Demand for the Group's products and solutions largely moves in line with fluctuations in global industrial production. Trelleborg focuses on maintaining an exposure to its market segments that has a good balance between early and late cyclical industry, meaning general as well as capital-intensive industry, the demands from which often balance each other out. Seasonal effects occur in the various market segments, particularly in the agricultural segment, which normally experiences higher demand for tires for agricultural machines during the first half of the year. For the Group, demand is usually higher in the first half of the year than in the second half of the year.

**Long-term risks.** Trelleborg has identified the relevant areas based on strategic risks, operational risks, regulatory compliance risks and financial risks that may result in damage or loss with substantial impact on the entire Group and therefore justify management of the risk exposure at Group level.

For information regarding the Group's risks, risk exposure and risk management, refer to the latest Trelleborg Annual Report, www.trelleborg.com.

**Short-term risks.** The Coronavirus pandemic and the measures taken by various countries to prevent the spread of

the virus have impacted the Group. In addition to the known effects, the macroeconomic uncertainty is causing a reduction in economic activity and the long-term impact on the Group's operations is currently unknown. The scope and length of this pandemic are uncertain, but are expected to affect Trelleborg further. The most important risks resulting from the current uncertain situation relating to the pandemic are:

- Supply chain: The Group's access to components and the ability to transport finished products to customers could be affected. However, in general, the Group is not currently experiencing any major disruptions to its supply chain.
- Earnings and profitability: Trelleborg's revenue could be affected by individual countries' decisions on extraordinary measures and customer behavior resulting from the Coronavirus pandemic.
- Capital employed: The Group initiated an extended review of working capital, with particular focus on accounts receivable and inventory. Inventory was lower at the end of 2020 compared with the situation at the preceding year-end and overdue accounts receivable declined compared with year-end 2019.
- Financing and liquidity: Trelleborg has a strong financial base, with good liquidity and long-term confirmed financing in place. The only financial covenant on the Group's syndicated loan facilities is based on the net debt/equity ratio, excluding the impact of IFRS 16 and pension liabilities, which must not exceed 150 percent. The Groups net debt/equity ratio, by this definition, amounted to 25 percent at year-end.

This report has not been subject to review by the company's auditor.

### **FOURTH QUARTER 2020**

Organic sales for the quarter declined 5 percent year on year. Sales were stable and slightly growing in Europe and Asia, but declined in North America. Sales to the aerospace industry remained strongly negative, significantly impacted by the Coronavirus pandemic. Sales to the construction-related market segment were somewhat higher compared with the preceding year. Deliveries to the automotive industry continued to make a strong recovery and were significantly higher than in the year-earlier quarter, displaying growth in all markets.

**EBIT and the EBIT margin** increased year on year, driven by effective price management, strict cost control and a favorable sales mix. Exchange rate effects from the translation of foreign subsidiaries had a negative impact of SEK 24 M on EBIT compared with the year-earlier quarter.

### **FULL-YEAR 2020**

**Organic sales** for the full year declined 10 percent compared with 2019. Sales were significantly lower in North America, lower in Europe and slightly lower in Asia. Most market segments reported negative organic sales. Deliveries of marine solutions stood out insofar as sales were unchanged compared with the preceding year.

**EBIT and the EBIT margin** decreased compared with the preceding year, mainly as a result of falling sales caused by the Coronavirus pandemic. Meanwhile, good cost control limited the decline in earnings. Exchange rate effects from the translation of foreign subsidiaries had a negative impact of SEK 36 M on EBIT compared with the preceding year.

### **FOURTH QUARTER 2020**

Organic sales for the quarter declined 4 percent year on year. Sales to general industry declined in North America, but were slightly positive in Europe and Asia. Sales to the automotive industry continued to recover sequentially in all regions, and increased in both Europe and Asia, but remained somewhat lower in North America. Sales to the aerospace industry continued to be subject to a strong negative impact from the ongoing pandemic and deliveries leveled off at a significantly lower level. Sales to healthcare & medical were positive.

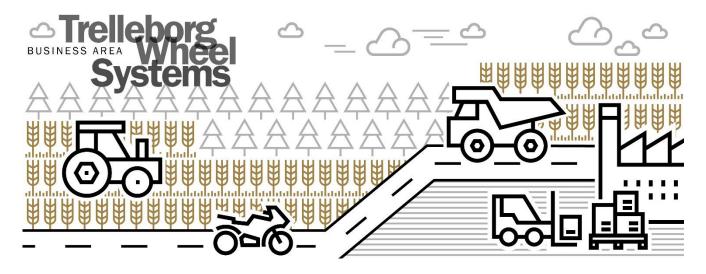

**EBIT and the EBIT margin** declined due to under-utilization in parts of the business area as a result of the drastic decline in, primarily, the aerospace industry. Exchange rate effects from the translation of foreign subsidiaries had a negative impact of SEK 41 M on EBIT compared with the year-earlier quarter.

### **FULL-YEAR 2020**

Organic sales for the full year declined 10 percent compared with 2019. Sales to Europe and North America were negative for the year, while Asia was unchanged. The weakest organic sales development was noted for deliveries to the aerospace industry, but even sales to general industry and the automotive industry were severely affected by the Coronavirus pandemic. Deliveries to healthcare & medical grew during the year.

**EBIT and the EBIT margin** declined, mainly resulting from a fall-off in volumes caused by the pandemic. However, the decline in earnings was limited due to strict cost control. Exchange rate effects from the translation of foreign subsidiaries had a negative impact of SEK 48 M on EBIT compared with the preceding year.

### **FOURTH QUARTER 2020**

Organic sales for the quarter rose by 8 percent year on year. Sales of tires for agricultural machinery increased significantly in most markets, driven by a pent-up need, which led to the healthy demand. Deliveries of agricultural tires to OEMs and aftermarket customers increased in all markets. Organic sales of tires for material handling and construction vehicles declined in both sales channels year on year. The trend was similar in most markets.

**EBIT and the EBIT margin** increased significantly as a result of higher sales volumes and a comparative period in the preceding year that was characterized by large inventory adjustments and, accordingly, unusually low margins. Exchange rate effects from the translation of foreign subsidiaries had a negative impact of SEK 17 M on EBIT compared with the year-earlier quarter.

### **FULL-YEAR 2020**

Organic sales for the full year declined 7 percent compared with 2019. Sales declined in all major regions. The organic sales trends for tires for agricultural machinery, material handling vehicles and construction machinery were all negative, driven by a fall in volumes and inefficiency caused by the Coronavirus pandemic. During the second half of the year, the situation improved for the agricultural market, at the same time as the market situation for tires for material handling and construction vehicles was strained for the remainder of the year.

**EBIT and the EBIT margin** increased, driven mainly by structural measures and strict cost control resulting from difficult market conditions in the wake of the Coronavirus pandemic. Previous investments made in capacity commissioned during the year supported the earnings improvement. Exchange rate effects from the translation of foreign subsidiaries had a negative impact of SEK 36 M on earnings compared with the preceding year.

The reporting segment Businesses Under Development comprises areas where improvement in position and profitability must occur; the operations of printing blankets, offshore oil & gas, technical rubber products, as well as bicycle tires.

### **FOURTH QUARTER 2020**

Organic sales for the quarter declined 16 percent year on year. Sales declined in all regions, driven by a weak trend in offshore oil & gas and printing blankets. Deliveries of printing blankets fell in most markets, impacted by the Coronavirus pandemic and the restrictions that remain in place. The technical rubber products operations in the Czech Republic recovered in several product groups, but organic development was negative overall compared with the year-earlier quarter.

**EBIT and the EBIT margin** increased primarily as a result of improvements made earlier in the operations in the Czech Republic, as well as generally good cost control in all operations and a favorable sales mix. Exchange rate effects from the translation of foreign subsidiaries had a negative impact of SEK 11 M on EBIT compared with the year-earlier quarter.

### **FULL-YEAR 2020**

Organic sales for the full year declined 5 percent compared with 2019. Offshore oil & gas noted an organic increase in sales during the year despite a weaker sales trend in the fourth quarter. Other Businesses Under Development, meaning printing blankets and technical rubber products, were impacted by ineffectiveness for much of the year that arose as a result of the ongoing pandemic.

**EBIT and the EBIT margin** improved significantly compared with the preceding year, with previously implemented structural measures and strict cost control explaining the increased earnings. Exchange rate effects from the translation of foreign subsidiaries had a negative impact of SEK 11 M on earnings compared with the preceding year.

During the year, the Swedish and Estonian operations that manufacture molded components were divested, as well as a small operation in France that manufactures rubber-covered rollers and rubber belts, which was part of the reporting segment's printing blankets operation.

### NOTES

This report has been prepared in accordance with IAS 34 Interim Financial Reporting and the applicable rules of the Swedish Annual Accounts Act.

Disclosures in accordance with IAS 34.16A appear in addition to the financial statements and their accompanying notes also in other parts of the interim report.

The Parent Company applies recommendation RFR 2, Accounting for Legal Entities of the Swedish Financial Reporting Board and Chapter 9 of the Swedish Annual Accounts Act, Interim Reports. The accounting policies applied by the Group and Parent Company correspond to the accounting policies applied in the preparation of the most recent annual report.

New and amended IFRS standards applied from January 1, 2020:

- Amendments to References to the Conceptual Framework in IFRS Standards.
- Amendments to IFRS 9, IAS 39 and IFRS 7: Interest rate benchmark reform.
  The amendment is an effect of reforms to the interbank offered rates, which include the impending replacement of generally used interbank offered rates (such as STIBOR, EURIBOR, LIBOR) for alternative, risk-free interbank offered rates. IASB has issued an easing of the criteria used for hedge accounting so companies that apply hedge accounting can assume that the reference rate that hedged cash flow and cash flow from the hedging instrument does not change as a result of uncertainty from the interest rate benchmark reform.
- Amendments to IFRS 3 Business Combinations Definition of a business.
  The purpose of the amendment is to clarify the definition of a business combination with the aim to make it easier for companies to analyze if an acquisition constitutes a business combination or an asset acquisition.
- Amendments to IAS 1 and IAS 8: Definition of "material".
  The amendment aims to clarify which information is material in preparation of the financial statements and therefore the texts in IAS 1 and IAS 8 have been adapted.
- Amendments to IFRS 16: Covid-19-Related Rent Concessions.
  The amendment concerns rent concessions that are directly related to COVID-19 and entail a voluntary exemption from the lease modifications rules in IFRS 16 Leases. This exemption only applies to the lessee, and does not affect reporting by the lessor. Trelleborg has chosen to utilize this exemption rule.

The amendments as set out above had no material impact on the Group's financial statements.

New standards and interpretations that have not yet come into effect:

A number of new and amended IFRS have not yet come into effect and were not applied prospectively in connection with the preparation of the Group's and Parent Company's financial statements. These amended standards or interpretations are not expected to have any material impact on the Group's or Parent Company's financial statements.

# Key figures

Trelleborg employs a number of alternative performance measures related to financial position, including: return on equity and capital employed, net debt, debt/equity ratio and equity/assets ratio. The Group deems the key figures useful for the readers of its financial reports as a complement for assessing the possibility of dividends, implementing strategic investments and considering the Group's ability to meet its financial commitments. In addition, Trelleborg uses the cash-flow measurements of operating cash flow and free cash flow to provide an indication of the funds the operations generate to be able to implement strategic investments, make amortizations and pay returns to the shareholders. Trelleborg uses the performance metrics of EBITDA, EBITA and EBIT excluding items affecting comparability, which the Group considers to be relevant for investors seeking to understand its earnings generation before items affecting comparability.

For further description and calculation of key figures, see www.trelleborg.com/en/investors/financial-definitions.

#### Measurement techniques used to calculate fair value of level 2 assets

Level 2 derivatives comprise currency futures and interest swaps and are primarily used for hedging purposes, but also for trading. Measurement of the fair value of currency futures is based on the published forward rates in an active market and on the discounted contractual cash flows. Measurement of interest swaps is based on forward interest rates prepared on the basis of observable Swedish interest curves and discounting of the contractual cash flows.

#### Measurement techniques used to calculate fair value of level 3 assets

A financial interest-bearing receivable of SEK 10 M is recognized at fair value. The carrying amount is a good approximation of the fair value. Interest-bearing non-current and current liabilities include earnouts according to contract in an amount of SEK 20 M (37) and SEK 20 M (39), respectively. An assessment of the most probable outcome was made and the present value of this calculated.

### Disclosure on fair value of borrowings and other financial instruments

Financial interest-bearing liabilities, except for financial derivatives that adjust loans and earnouts according to contract, are recognized at amortized cost. Changes in interest-rate levels and credit margins create differences between fair value and amortized cost. Measurement at fair value would increase the Group's non-current loans by SEK 76 M. No remeasurement was made for current loans because the carrying amount is regarded as a good estimate of the fair value due to their short term.

## ABOUT TRELLEBORG

Trelleborg is a world leader in engineered polymer solutions. We seal, damp and protect critical applications in demanding environments. Our innovative solutions accelerate performance for customers in a sustainable way.

#### **Business concept**

Trelleborg's business concept is to seal, damp and protect in demanding industrial environments.

### Strategy

Trelleborg's strategy is to secure leading positions in selected segments. This means that Trelleborg seeks segments, niches and product categories that – by virtue of the Group's market insights, core competencies and offering of advanced products and solutions – provide market leadership. In this manner, long-term shareholder value and added value are generated for customers. Trelleborg works with the strategy, both Groupwide and in the business areas, supported by four strategic cornerstones that – individually and in combination – underpin the strategy. The strategic cornerstones are: Geographic balance, Portfolio optimization, Structural improvements and Excellence.

#### Value drivers

**Polymer engineering.** Trelleborg should be best at developing polymer-based solutions that optimize and accelerate customers' applications and processes.

**Local presence, global reach.** Trelleborg leverages global strength and capabilities, while acting as a local partner to customers.

**Application expertise.** Trelleborg should be best at understanding customers' applications, thereby adding the most value.

**Customer integration.** Trelleborg makes it easy to do business with the Group and integrates in close partnerships with its customers.

**Business accelerator.** Powered by these core capabilities, the aim is always to improve, accelerate and grow customers' businesses. Trelleborg grows with its customers.
